Experience

Freelancer
2023 - Currently

As a freelance frontend developer, I specialize in building dynamic web apps. I collaborate closely with clients to transform their ideas into engaging user experiences, ensuring high-quality code and responsive design in every project

TECFIN212
2022 - 2023

Created web applications for sales and management purposes, leveraging React.js and TypeScript. Focused on enhancing user engagement and optimizing administrative workflows

Direccion de Ciencias Tecnologia e Innovacion
2022

Developed applications for state fuel management and administrative architecture, utilizing React.js and TypeScript. This role marked my entry into the tech world, allowing me to gain valuable experience in building scalable solutions

Featured Projects

GooseSmurfs: Built from the ground up using Next.js

CBAC: Contributed to the development of various small applications, enhancing functionality and user experience

Brewers Portal: Engineered from scratch leveraging Next.js and Tailwind CSS
